

## Math For Knitters

Kate Atherley  
*B. Mathematics, Pure Math  
University of Waterloo, 1992*

### Math: it’s everywhere...

Increase 5 stitches evenly across the next round.

Place 7 buttonholes evenly distributed along button band.

Pick up and knit 3 stitches for every 4 rows, making sure you end up with a multiple of 4 sts plus 2.

### Yarn Shop Math

**1 yard = .9 meter**

- To convert yds to m, multiply by .9.
- To convert m to yards, divide by .9.

**1 cm= .4 inch**

- To convert inches to cm, multiply by .4
- To convert cm to inches, divide by .4

### Yarn Shop Math

**Buy yarn by length, not weight**

- Cascade 220 – 100g = 220yds
- Spud & Chloe Sweater – 100g = 160yd

**Buy yarn by length, not number of balls**

- Paton’s Canadiana – 100g = 187m
- Paton’s Canadiana Tweeds – 85gm = 174m

### Pattern Math

Increases, decreases and buttonholes, Oh My!

### “Evenly spaced”

Increase 6 sts evenly spaced across 30 stitches of current round.

Place 7 buttonholes evenly spaced across 86 stitches of current row.

Decrease 5 sts evenly spaced across 56 stitches of current row.

### Increasing

Increase 6 stitches evenly spaced across 42 stitches of current *round*.

$$42 \div 6 = 7$$

Increase round: (K7, m1) 6 times.

Increase 6 stitches evenly spaced across 42 stitches of current *row*.

Increase row: (K7, m1) 6 times.

K4, m1, k7, m1, k6, m1, k7, m1, k7, m1, k7, m1, k4

### Increasing

Increase 5 stitches evenly spaced across 58 stitches of current row.

$$58 \div 5 = 11.6$$

5 x 11 = 55, with 3 left over

K11, m1, k11, m1, k11, m1, k11, m1, k11, m1, k3.

To distribute better, steal a few sts from the start & put them at the end.

Increase row:

K7, m1, k11, m1, k11, m1, k11, m1, k11, m1, k7.

### Decreasing

Decrease 5 evenly spaced across 60 stitches of current *row*.

$$60 \div 5 = 12$$

K10, k2tog, k10, k2tog, k10, k2tog, k10, k2tog, k10, k2tog.

To distribute better, steal a few sts from the start & put them at the end.

K5, k2tog, k10, k2tog, k10, k2tog, k10, k2tog, k10, k2tog, k5.

K5, k2tog, (k10, k2tog) 4 times, k5.

### Buttonholes

Place 5 evenly spaced across 60 stitches of current *row*.

$$60 \div 5 = 12$$

K10, BH, k10, BH, k10, BH, k10, BH, k10, BH.

To distribute better, steal a few sts from start & put them at the end.

K5, BH, k10, BH, k10, BH, k10, BH, k10, BH, k5.

K5, BH, (k10, BH) 4 times, k5.

### Gauge & Garment Math

### Gauge

18 sts/24 rows

CO 1.5-2x sts  
Work to 6 inches  
Measure  
Block  
Measure

### If you don’t match gauge... It won’t fit!

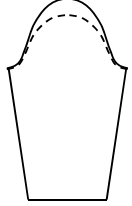

Pattern calls for 18 sts/4 inches  
Making the size with the 40-inch chest

<p><b>At 20 sts/4 inches</b></p> <p>Finished sweater is 36"</p> <p><math>18 \text{ sts}/20 \text{ sts} = .9</math> <math>40 \times .9 = 36 \text{ inches}</math></p>	<p><b>At 16 sts/4 inches</b></p> <p>Finished sweater is 45"</p> <p><math>18 \text{ sts}/16 \text{ sts} = 1.125</math> <math>40 \times 1.125 = 45 \text{ inches}</math></p>
--	--

### Row Gauge Matters, Too

Pattern gauge: 5 rows/inch  
Knitter’s gauge: 5.75 rows/inch

Sleeve cap shaping takes place over 28 rows

- At pattern gauge, cap shaping covers  $5 \frac{3}{4}$  inches
- At knitter’s gauge, cap shaping covers  $4 \frac{3}{4}$  inches

### So Just Knit A Different Size.

“Cheesy Puffs”

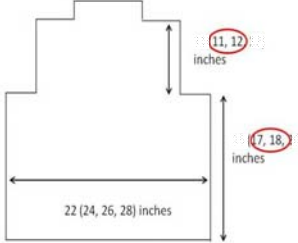

- Pattern gauge = 13 sts
- Knitter’s gauge = 14 sts
- Aiming for 48 inch chest

Size M as written = 48 inch chest  
Size M worked at new gauge =  $48 \times (13/14) = 44.5$  inches

Size L as written = 52 inch chest  
Size L worked at new gauge =  $52 \times (13/14) = 48$  inch chest

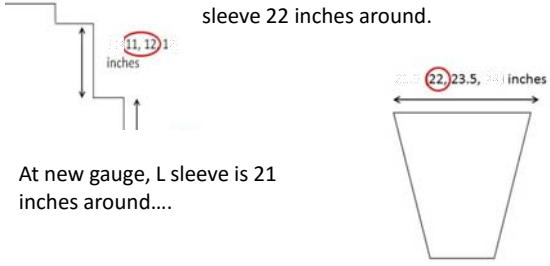

### Issue #1: Length is Wrong

If you follow L instructions, you’ll get L lengths.

### Issue #2: Sleeves Won’t Fit Into Armholes

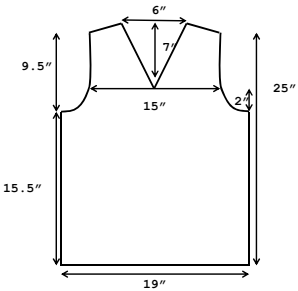

M armhole is 11 inches deep – requires sleeve 22 inches around.

At new gauge, L sleeve is 21 inches around....

### Doing It Right

Figure out the measurements and do the math...

### The Gauge Adjustment “Degree of Difficulty” Index

<b>Math-free</b> <ul style="list-style-type: none"> <li>• Triangular, circular, semi-circular shawls</li> </ul>
<b>Easy math</b> <ul style="list-style-type: none"> <li>• Unshaped pieces – scarves, cowls, blankets</li> <li>• Hats</li> </ul>
<b>Less Easy But Still Doable</b> <ul style="list-style-type: none"> <li>• Minimally shaped pieces where fit doesn’t matter</li> <li>• Unshaped garments – drop shoulder</li> </ul>
<b>Essentially designing a new garment</b> <ul style="list-style-type: none"> <li>• Garments with shaping &amp; fit</li> </ul>

### What if you *don’t* want to do math?

### Shop for Patterns Differently

<b>The Bones</b> <ul style="list-style-type: none"> <li>• Construction</li> <li>• Gauge</li> <li>• Size</li> <li>• Armhole shaping</li> <li>• Neckline</li> <li>• Fabric type                             <ul style="list-style-type: none"> <li>– Plain vs. cables vs lace vs. colourwork</li> </ul> </li> </ul>	<b>The Decorations</b> <ul style="list-style-type: none"> <li>• Color, stripes</li> <li>• Edgings                             <ul style="list-style-type: none"> <li>– Ribbing/garter/seed...</li> </ul> </li> <li>• Finishes                             <ul style="list-style-type: none"> <li>– Buttons, zippers, ...</li> <li>– Collar size/shape</li> </ul> </li> </ul> <b>Minor Alterations</b> <ul style="list-style-type: none"> <li>• Body length &amp; shaping</li> <li>• Sleeve length &amp; shaping</li> </ul>
---	--

### Garment Alterations “Degree of Difficulty” Index

<b>Math-free</b> <ul style="list-style-type: none"> <li>• Change color</li> <li>• Add stripes</li> <li>• Change edgings, finishes</li> </ul>	<b>Easy</b> <ul style="list-style-type: none"> <li>• Adjust body length</li> <li>• Adjust body shaping</li> <li>• Adjust sleeve length</li> </ul>
<b>Less Easy But Still Doable</b> <ul style="list-style-type: none"> <li>• Bust darts</li> <li>• Adjust neckline depth, style</li> <li>• Pattern stitches w/o gauge change</li> </ul>	
<b>Essentially designing a new garment</b> <ul style="list-style-type: none"> <li>• Creating a new size</li> <li>• Changing gauge</li> <li>• Pattern stitches with gauge change</li> </ul>	
<b>Even designers find this challenging</b> <ul style="list-style-type: none"> <li>• Changing armhole/sleeve cap construction</li> </ul>	

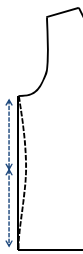

### Adjusting Body Length and Shape: The Concept

Measure:  
Distances from underarm to waist, from hem to waist

Decide:  
Desired waist circumf = actual waist + ease

Calculate  
Waist sts = waist circumference x sts per inch  
Sts to shape between hem & waist  
Sts to shape between waist & underarm  
# rows between hem & waist, between waist & underarm

Distribute Shaping  
Between hem & waist; between waist & underarm.

### “Distribute Shaping”

Decrease 5 times within 60 rows.

$60 \div 5 = 12.$   
Decrease every 12<sup>th</sup> row, 5 times.

(Decrease row, 11 even rows) 5 times.

6 even, (decrease row, 11 even) 4 times,  
decrease, 5 even.

Thank you!
